Abstract

In the paper two reliability models for balanced systems are developed based on some real background. The main results are presented by using matrix theory. The approach taken in this paper is entirely based on the Laplace-transform.....

Key words: System reliability, Balanced system, Mean lifetime

Requirements in detail: (the above is an example)

- (1). One page (A4), 1.5 lines;
- (2). The size of words is 12 pounds, in Times New Roman.
- (3). Formulas and figures are not allowed to appear in the abstract.
- (4). The number of key words is less than 6.
- (4). The editable file for abstract is sent to: Professor Lirong Cui via Email: Lirongcui@bit.edu.cn, the email subject: Abstract-SMRLO2019-Your name, for example, Abstract-SMRLO2019-Liudong-Xing
